The HOME of GOOD SEEDS Bulbs, Plants and Nursery Stock

Farmer's Home And Rest — Warm Stove — Easy Chair
Established Forty Years Ago

A FRIENDLY TIP: Plant a home garden this spring. A healthful exercise and a swat at the High Cost of Living. The city man, the suburbanite and the farmer, too. Any farmer can save \$500.00 a year with a good home garden.

CATALOG: In handing you our new Economy edition semi-descriptive catalog we wish to express our thanks and appreciation and good will in days gone by.

Quickest seed catalog ever printed.

Disclaimer: While we exercise the greatest care to have all seeds pure and reliable, it is positively understood we sell no seeds, plants, bulbs or nursery stocks with any warranty expressed or implied in any respect and will not be in any way responsible for the crop.

HOW to make a lawn

In preparing a seed bed so as to insure an everlasting lawn, it is well that the earth be stirred deeper than merely scratching the surface, either with a good stirring plow or spade to the depth of a foot or 15 inches, or even more. This is the first step to be taken, and the next consideration is the fertility of the soil where you are making the lawn. Among the various methods which increase the fertility of the soil we find that **Humus** plays a most important part. The very best time to do the work of preparing the soil for a lawn is in the autumn season and then left for the winter. The soil is solidified by the winter condition. Then in the spring the surface should be slightly stirred and the seed sown, well raked and rolled. When the summer is over and the winter comes on again, the lawn needs attention, and it is a wise plan after the ground is slightly frozen to cover it with a moderate coat of well rotted manure. In the springtime before the growth of grass has started, this coat of manure should be well raked in the soil, and the roughage raked off, giving the grass a chance to get plenty of sunlight. Should, however, this be overlooked in the autumn, then in the springtime again it is well to apply a moderate amount of sheep manure, phosphate or ground bone fertilizer, well raked into the soil just as soon as is possible and at such time it is well to apply a sprinkle of our blend of **Reseeding Lawn grass seed**.

These suggestions in regard to the making of a lawn will well repay the time and expense by the increased growth of grass.

Phone 8-8666

Former Century

1896

Piccadilly Period

Born in Virginia. As a young man, took Horace Greeley's advice to heart, and migrated West in 1880. Came to Sioux City in 1884. With others here he helped to found and establish a seed business at Sioux City. Now last of the four that were then. That business today still a flourishing institution with ideals based on **purity, vitality** and **perfection**; promises to grow greater in the years to come.

AS IS TODAY

Well known seedsman, still doing business at the old stand founded forty years ago. Selling today the grandchildren of those who bought seed from him forty years ago.

American Aster

Double Nasturtium

FLOWER SEEDS

ZINNIAS, PETUNIAS, NASTURTIIUMS, SWEET PEAS, ASTERS, PANSIES and MARIGOLDS according to our data of sales are the most used flower seeds. More of these varieties planted than most any other kind of flower seeds. Our selections listed here are of the best varieties of these kinds. The latest improved by cross fertilization known-grown by specialists in flower seed growing. Especially do we recommend our **Dahlia Type** of Zinnias. Blooms in June until frost.

Valencia Plants10	.75	4.50

VEGETABLE KINGDOM VS. ANIMAL KINGDOM

Life on this earth is divided into two great kingdoms; the vegetable kingdom and the animal kingdom. These two kingdoms are again divided into wild life and domestic life. Vegetable kingdom is the old kingdom. The animal kingdom lives on the vegetable kingdom. Everything that we eat and wear comes from Mother Earth through the activities of plant life—the Vegetable Kingdom. “All flesh is grass”. Wild life is more resistant than domestic life which has been brought up to the high state of perfection we find it today from the wild life by the artificial effects of man’s labor and ingenuity—up and out of the fathomless past. Insects prey on domestic life rather than wild life for the reason that domestic plants furnish more succulent food. We protect domestic plants against these inimical things by insecticides and other remedies. See page 22.

Mowing

Alfalfa

AGRICULTURAL SEEDS
ALL PRICES SUBJECT TO MARKET CHANGES

The great drouth and terrific hot weather July and August, 1936, destroyed many fields of CLOVER and ALFALFA crops of seed United States that year near failure and was not a normal seed crop yet in 1937. As a result PRICES are higher yet this year.

We give no warranty, expressed or implied, as to description, quantity, productiveness, or any other matter of any seeds, bulbs, nursery stocks or plants we send out, and we will not, in any way, be responsible for the crop, or any sweet clover infestation in alfalfa fields. Samples furnished on application.

ALFALFA SEED	PRICES	
	Fair to Superfine Qualities	
Common, Home Grown Seed	\$27.50 to	\$30.00 Per 100 lbs.

SEED POTATOES

All prices quoted for seed corn and seed potatoes are subject to market changes and stocks unsold.

SEED POTATOES (Red River Grown)

Early Ohio, for seed. Price on applicationPer Bushel
Ohio Cobbler, for seed. Price on applicationPer Bushel
Triumph, for seed. Price on applicationPer Bushel

WARBA HYBRID SEED POTATO

The main characteristics of the HYBRID WARBA potato are: earliness, upright sturdy vines, high yield, short round blocky white tubers with pink eyes, uniform size. Mosaic disease resistant, it is especially adapted for an early market potato and a great early variety for the home garden. Its season is ten to fourteen days earlier than Irish Cobbler and from seven to ten days earlier than Ohio and Bliss Triumph. Vines of the Warba less injured by high temperature than Bliss Triumph. Vines green until normally matured. Flesh conspicuously white and crisp. Price per bu. \$2.50

KATAHDIN HYBRID SEED POTATO

The HYBRID KATAHDIN potato is a double cross, the crossing of two crosses, with a history like the breeding of hybrid seed corn, introduced by the United States Department of Agriculture. Has the advantage, once produced, does not require continuous breeding like hybrid seed corn does. This hybrid is smoother, rounder than most other varieties. The Experiment Station of North Dakota, from four potatoes, raised one bushel. Price per bushel, \$2.50

THE MICHAEL SEED STORE

SIOUX CITY, IOWA

316 Pearl Street :-: Phone 8-8666

SEED CORN

All prices quoted for seed corn and seed potatoes are subject to market changes and stock unsold.

SEMESAN Jr.

A Dust Disinfectant for Seed Corn

4-oz. tin\$0.50
1-lb. tin 1.65
5-lb. tin 5.00

Iowealth Hybrid Seed Corn

FIELD CORN SEED

Reids Improved, Home Grown\$1.50 to \$2.00 Per Bushel
Wimple Yellow Dent, Home Grown 1.50 to 2.00 Per Bushel
Yellow Hammer, Extra Early, 90 days 2.50 to 3.00 Per Bushel
Silver King, Early White Dent 2.50 to 3.00 Per Bushel
Other Varieties, less important kinds 1.50 to 2.00 Per Bushel

HYBRID FIELD CORN SEED

This Iowealth Hybrid Corn of ours was bred not only to out-yield, but also bred for a deeper root system which makes it drouth resistant, wind resistant and heat resistant. Its wide spreading deep root system, is the trick that does it. Iowealth Corn with its powerful root system grows heavy, strong stock that produces, not only one ear but a good second ear.

WE QUOTE THIS YEAR'S PRICES AS FOLLOWS:

IOWEALTH Hybrid Seed Corn, edge drop\$7.00 Per Bu.
IOWEALTH Hybrid Seed Corn, Special Plate 5.00 Per Bu.
IOWEALTH Hybrid Seed Corn, large hill drop 5.00 Per Bu.

COLD RESISTANT IOWEALTH HYBRID CORN

A new thing in corn that will change corn planting like the automobile did travel over the horse and buggy age.

IOWEALTH Hybrid Cold Resistant, edge drop\$8.00 Per Bu.
IOWEALTH Hybrid Cold Resistant, Special Plate 7.00 Per Bu.
IOWEALTH Hybrid Cold Resistant hill drop 5.00 Per Bu.

See Page 5 for Hybrid Strains of Sweet Corn.

ROSE DISEASES

The rose faces four deadly menaces, anyone of which would destroy the rose garden if left unchecked. Black Spot presents the greatest Problem. Easily controlled if one starts making exterminating applications when the leaves first appear — additional applications week or ten days later if necessary. Mildew, leaf-eating insects, and aphids are the other controlled in the same way as Black Spot either by dusting or spraying will exterminate these diseases. Insecticides page 22.

Tri-Ogen, per Kits \$1.50

Chinese Elm

NATIVE SHADE TREES	Price Per Each
Ailanthus, 4 to 5 ft., Tree of Heaven, Very Rapid Grower	\$0.50

PROTECTION
FROM DOGS
RABBITS, CATS,
MOLES and MICE,
from Evergreens
and fruit trees.
Drives Dogs Away Never
to Return

An Evergreen setting, landscaped around a home in the back ground, not only beautifies but is green and attractive the whole year around. It gives the home an inviting appearance. Autumn planting of Evergreens is really the best time of year to set them out, but spring time is good if you haven't had time to plant them in autumn. We handle a complete line of both dwarf and taller Evergreens, too, in the autumn as well as in the spring.

Fertilizers, Insecticides and Poultry Foods
